
HSUPA

Â

HSUPA (High Speed Uplink Packet Access) Enhancements to the uplink data speed is known as High Speed Uplink Packet Access (HSUPA). HSUPA network technology was launched in 2007, with now over 30 HSPA networks enhanced with HSUPA. Jointly, downlink and uplink enhancements are referred to as HSPA (High Speed Packet Access) services. Increased downlink and uplink speeds will further enhance user experiences and increase the use of application and activities especially where data is shared between users.
